

# Intelligent Automation Transparent Performance Quant-Driven Execution

Quarterly Membership | EA Vault | QN Wallet | QN Trading API

# Executive Overview

Quantro Network is a premium automation ecosystem for disciplined subscribers who want institutional-grade algorithmic trading without manual execution. Through membership, subscribers access a vault of engineered Expert Advisors (EAs) running inside Quantro's secure automation framework. The system includes: Quantro Wallet, EA Vault, and Trading API Portal.

Unverified bots with inconsistent results.

# The Problem

Retail automation today is chaotic

Little or no transparent performance data.

Weak guardrails that risk capital and platform integrity. Quantro brings institutional discipline to everyday subscribers.

# Our Solution

A unified automation platform that covers every layer

Simple flow. Full control. Measurable results

01

Membership

03

EA selection

05

Live monitoring

02

Funding

04

License activation

06

Smart  
Withdrawals

# How It Works

**01**

## Activate Membership Pack

A small activation unlocks the EA Vault and all Expert Advisors. Your journey begins with just a simple step.

**02**

## Fund Quantro Wallet

Top up with USDT, BTC or other currencies to power your automation.

**03**

## Select EA

Choose from our EA Vault (Atlas or Zenith) based on your strategy and risk preference.

**04**

## Activate License Key

Secure your monthly license linked to your ID for continuous access.

**05**

## Monitor Execution

Track real-time performance and health metrics through the Trading API dashboard.

**06**

## Withdraw / Adjust

Track real-time performance and health metrics through our live ongoing trading API dashboard.

# The EA Vault

Each EA is built for precise execution and real-time adaptation

## Quantro Atlas

hedging + scalping; micro-returns and adaptive risk balancing. (As provided: Quantro Atlas yields 1% daily.)

## Quantro Zenith

hedging, scalping & monte carlo stimulation for rapid markets. (As provided: Quantro Zenith yields 1.8% daily.)

Both EAs operate under constant risk supervision and system health monitoring, ensuring consistent performance and safety.

# Trading Cadence & Ops

**01**

## Trade Frequency

Our EAs more than 50 trades daily

**02**

## Operational Days

Automated 7-day cycle with health checks before sessions.

**03**

## Monitoring

Real-time telemetry, session logs, and version tracking.

# Quantro Wallet

The QN Wallet is the internal balance layer that powers automation

## Audit

Every movement is recorded and exportable.

## Funding

Top up inside the platform.

## Control

Withdrawals processed under platform rules (one standard withdrawal per day).

## Security

Multi-layer encryption and balance segmentation.

# Withdrawal & Lockup Rules

**Seed capital = \$1,000. User withdraws before 75 days**

- Early withdrawal penalty (15%):  $1,000 \times 0.15 = \$150$ .
- Remaining after penalty:  $1,000 - 150 = \$850$ .
- Withdrawal fee (2%) on the remaining:  $850 \times 0.02 = \$17$ .
- Net amount user receives:  $850 - 17 = \$833$ .

Transparency is not optional at Quantro Network, it's the foundation of our system integrity.

01

## Seed capital lock

Your seed capital (the money you put into the bot) stay actively traded for 75 days and if you want to withdraw before 75 days active trade its incurs a 15% performance deduction.

02

## Early withdrawal penalty

If you withdraw seed capital before 75 days, a 15% penalty applies. This penalty helps protect the platform and other subscribers.

03

## Minimum withdrawal

The Minimum withdrawal you can request is \$20.

04

## Withdrawal fee

Every withdrawal has a 2% processing fee. This covers network and processing costs.

05

## Why these rules exist

They protect liquidity and keep the bots working well. They stop short-term abuse and make results predictable for all members.

# System Guard rails & Controls

**01**

## Execution discipline

hedging + scalping  
control exposure.

**02**

## Operational safety

health checks and  
pause/resume  
controls.

**03**

## Volatility filters

define execution  
windows and limit  
exposure.

**04**

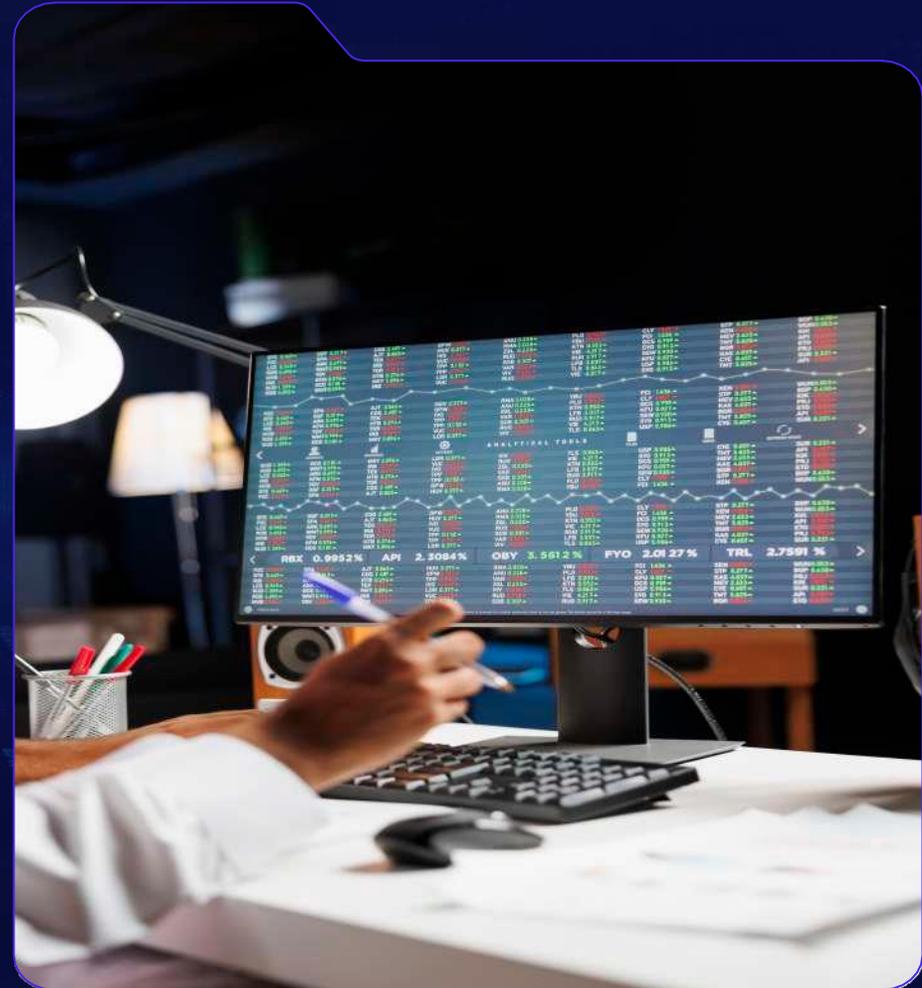

## Transparency

live metrics, drawdown  
stats, and runtime  
diagnostics for every  
subscriber.

# Trading Infrastructure

## Core tech strengths

- Low-latency routing and adaptive positioning engine.
- Hedging layer for market-neutral exposure.
- Scalping microstructure for minimal slippage.
- Telemetry hub streams anonymised performance data to our Expert Advisor API.
- Quantum Computing for faster performance

# Transparency & Reporting

Quantro Networks gives members full, clear access to what the EAs do. Every trade, session, and system change is visible so subscribers can check performance, compare versions, and export data for their own review. This makes the platform honest, auditable, and easy to use.

**Transparency is Core Infrastructure, Not Optional**

- Live execution sessions and full trade records (see trades as they happen).
- EA version info and uptime data (which bot version ran and when).
- Historical session summaries and runtime snapshots (past performance at a glance).
- Exportable logs for independent analysis (downloadable CSVs or reports).

- Onboarding modules: Setup, license activation, wallet management.
- Education on algorithm logic, risk, and EA behaviour.
- Periodic briefings and transparency reports for community assurance.
- Dedicated support for verified subscribers.

# Education & Support

## QUANTRO ACADEMY

Quantro Academy also shares monthly updates and system insights to keep every member informed.

# Risk Philosophy

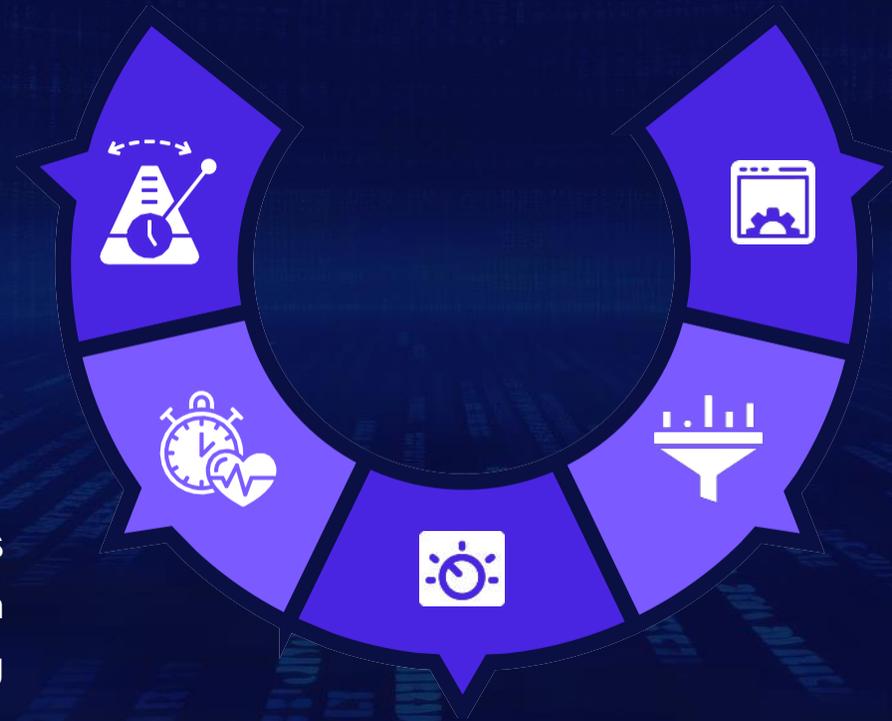

Automation is powerful when governed

## Math-driven limits

rules and algorithms carry out safety: mathematics + limits = reliable automation

## Real-time health checks

systems are checked before each session to ensure everything is working

## Defined execution windows

bots trade only during preset time frames to reduce unexpected market risk.

## Volatility filters

trading pauses when markets are too unstable.

## Automatic exposure throttles

position sizes scale down automatically to limit losses.

# Referral Earnings System

Users can share their referral link, build their network, and earn commissions based on the daily trading performance generated by their downline's active EA licenses. All rewards are percentage-based and tied directly to real, verifiable EA output

# Rank-Gate / Level Unlocking System

Each level unlocks progressively through qualified volume (QV) and leadership indicators. This ensures every partner is rewarded for both personal performance and the strength of the organization they build.

## Level 1 — Automatically Unlocked

Every partner earns 15% on direct volume. No requirements.

## Level 2 — Performance Unlock

- Requirement: Level-1 QV  $\geq$  \$5,000
- Team Requirement:  $\geq$  1 Active Leg
- Unlocks Level-2 rewards at 4.5%.

## Level 3 — Team Build Unlock

- Requirement: Level-2 QV  $\geq$  \$15,000
- Team Requirement:  $\geq$  2 Active Legs
- Unlocks Level-3 rewards at 2.5%.

## Level 4 — Network Expansion Unlock

- Requirement: Level-3 QV  $\geq$  \$35,000
- Team Requirement:  $\geq$  2 Active Leg
- Unlocks Level-2 rewards at 4.5%.

## Level 5 — Leadership Development Unlock

- Requirement: Level-4 QV  $\geq$  \$75,000
- Team Requirement: 2 team leaders who have unlocked Level 3
- Unlocks Level-5 rewards at 0.4%

## Level 6 — Multi-Tier Leadership Unlock

- Requirement: Level-5 QV  $\geq$  \$150,000
- Team Requirement: 3 Active Legs who unlocked Level 4
- Unlock Level-6 rewards at 0.3%

## Level 7 — Organizational Leadership Unlock

- Requirement: Level-6 QV  $\geq$  300,000
- Team Requirement:  $\geq$  3 leaders who have unlocked Level 4
- Unlocks max payout with Level-7 rewards at 0.2%

# Step By Step Level Up

Quantro Network Team Volume Compensation Structure And Status When your total team subscription record turnover reaches a certain amount, you will receive a one-time direct bonus reward and a some stage you will get daily residual earnings credited weekly to your account. We give the direct bonus award to our valued subscribers as a way of recognising their efforts in creating and nurturing their teams. You become eligible for these bonus awards once your team's deposit turnover surpasses certain milestones, as shown in the table below.

## How Requirements Are Calculated

1. Total Team Volume - Sum of qualified volume from your entire 7-level organization.
2. Personal Volume - Your own active EA license subscription capital
3. Active Legs - A direct referral who holds at least one active membership plan and whose branch (up to 7 levels deep) contains at least one approved real deposit (reference not starting with ADMIN-).
4. Max Leg Percentage Cap - At ranks with a cap, the highest leg can contribute at most the specified percentage of the required volume. Example: Executive needs \$60,000 and has a 40% cap → the largest leg can only count \$24,000 toward the requirement; the rest must come from other legs.
5. One-time Bonus - Paid the first time you qualify for the rank.6. \*Weekly Bonus\* - Paid weekly while you maintain the rank qualification.

# Roadmap

## Monitoring & Mobile

- Add deeper live signals (latency, fills, drawdown alerts) so you can see exactly how bots perform.
- Cleaner dashboard with simple charts and quick filters for fast checks.
- Mobile view + push alerts so you can monitor and act from your phone.
- What this means: You'll be able to spot issues and check performance in seconds - anywhere.

Q1

## Test & Combine

- Strategy sandbox: run ideas on past data without risking funds.
- Multi-EA stacking: run two or more EAs together with automatic risk sharing.
- Smart alerts for key trade or health events.
- What this means: Try new strategies safely and combine bots to smooth returns.

Q2

## Scale & Integrate

- Bigger EA catalog with more risk choices.
- Enterprise tools: team dashboards, policy controls, white-label options.
- API access for verified partners and institutions.
- Future Integration of live trading signal and live staking pools (Coming soon)

Q4

## Insight & Funding

- Deep analytics: trade-level KPIs and clear performance breakdowns per EA.
- Algorithm reports that show when and why a bot worked.
- More funding options (extra crypto rails, easier on-ramps).
- What this means: Understand results clearly and fund accounts the way you prefer.

Q3

# Compliance & Disclaimers

- Quantro Network provides licensed access to automated trading software and educational materials.
- Performance varies with market conditions; no guaranteed outcomes.
- Tools carry inherent risk, subscribers should engage responsibly.

Quantro Network is a quant engineering simplified for disciplined subscribers.  
Membership. Control. Transparency.

# 90 days Prelaunch Special Membership Module

This is a 90 days Prelaunch Special Membership Module, this offer is only valid for 90 days during our prelaunch phase after the official launch, this membership structure will be changed

## Access Membership

Built for streamlined entry into the platform.

**\$99**

90 days Access  
membership

Quarterly

## Prime Membership

Designed for users who want the complete Quantro experience.

**\$199**

90 days the prime  
membership

Quarterly

Both tiers unlock seamless EA activation, transparent live trade analytics from all EAs, and uninterrupted use of Quantro Network's ecosystem.

# Quantro EA Vault

Quantro's dual-engine EA suite is built on institutional-grade quantitative architecture, designed to operate autonomously 7 days a week across global market cycles. Both engines run directly on the user's broker account, ensuring full transparency, real-time oversight, and zero custodial risk. The systems integrate a tri-core strategy model, scalping, dynamic hedging, and Monte Carlo simulation stress-validation to deliver resilience, adaptability, and structured performance across diverse market conditions.

- Quantro Atlas - Up to 1% Daily
- Minimum Entry: \$99 capital
- Maximum Entry: \$2,500

A controlled-growth model engineered for stable, repeatable performance. This engine targets 1% daily output through micro-scalping execution, hedge-offset balancing, and Monte Carlo validated position sizing. Built for users who prioritise precision and consistency over aggressiveness.

- Quantro Zenith – Up to 1.8% Daily
- Minimum Entry: \$2,500 capital

A more advanced, higher-intensity engine targeting up to 1.8% daily performance. Zenith employs a multi-layer scalping matrix, rapid-cycle hedge adjustments, and Monte Carlo scenario forecasting to pursue amplified output while maintaining disciplined drawdown management.

# Quantro

## CORE EXECUTIVE TEAM

**JEREMY McCANN**  
Founder

Meet the CEO & Chief Executive Officer Jeremy is a tech-driven creator whose passion for art pulled him into the NFT world, where he learned digital market behavior early. Through friends in software engineering, he gained access to private trading bots and spent years studying and testing them across crypto and forex, building a deep understanding of automated systems. He later strengthened his product-management experience with reputable U.S. tech firms, shaping the structured approach behind Quantro Network. Jeremy eventually assembled a multidisciplinary team to build a scalable automation ecosystem, leading the company with creative insight,

**PAUL LASHBROOK**  
Director of Operations

Over 20+ years of operational experience across U.S.-based tech and digital service firms such as Highland Solutions, Mobiquity, and Tandem. His strong background in systems coordination, workflow optimization, and large-scale operational structure makes him the steady force behind Quantro Network's smooth, disciplined, and scalable execution.

**ADRIANA LUCIA RAMOS**  
Chief Administrative Officer

Adriana brings over 11 years of administrative and organizational leadership, shaped through her experience with the Colombian corporate services firm Soluciones Administrativas Integrales S.A.S. Her strong background in internal governance, operational structure, and high-efficiency administrative systems makes her the stabilizing force behind Quantro Network's internal coordination and executive operations.

**TEVO CHO**  
Strategy and Risk Manager

Brings 6+ years of experience from respected Chinese tech firms such as Inspur and Hundsun Technologies, where he developed strong skills in strategy, risk evaluation, quantum computing and system analysis. His sharp decision-making helps keep Quantro Network stable and forward-driven.

**DECLAN CORDWAINER**  
Head of DEVOPS

Declan brings over 10 years of DevOps experience gained across multiple European tech environments
